

Ahh-Some[®]

Easy Step-by-Step Instructions

1. Remove Filter. Discard if white algae is present.
2. Measure **3 level teaspoons** into your tub and circulate the water with jets on high for 20 min (make sure air controls are off)
3. Turn off power to the Hot Tub
4. Clean scum line and any debris from edges of tub
5. Drain hot tub and rinse
6. Use ***Clean & Perfect*** and a microfiber cloth to clean all acrylic surfaces
7. Refill Hot Tub, insert new filter, and add ***Stain & Scale Control***
8. Bring in a water sample for analysis
